# EXECUTIVE SECURITY

---

Born out of a single **idea** to bring a new standard of **commitment** and **expertise** to the security Industry in Ireland.

- Executive Security was set up in 1979 to offer the complete range of electronic security solutions to the commercial markets.
- Since inception, we have provided innovative solutions to both small and large businesses. Today Executive Security holds a premier position within the Irish security Industry, counting many of the largest commercial, Industrial and financial Institutions as well as government agencies among its clients.
- Much of the company's success has been achieved by staying at the forefront of new technology, providing Innovative solutions to complex solutions to complex security needs and paying exceptional attention to detail, thus Inspiring the company's growth year after year.

Executive Security is a member of the following associations:

- The ISIA (Irish Security Industry Association) for which we hold the ISIA Quality Assurance Certificate – Qualsec Gold.
- The PSA (Private Security Authority), Licence No. 00451.
- The NSAI (National Standards Authority of Ireland) for which we are licenced to I.S. EN50131-1:2006, PSA.2006.12 and SR40:2005 standard.

With our head office in Sandyford Business Park, Dublin 18, Executive Security offers businesses a total solution to their security needs. We can provide total design, turnkey installations, after care service and maintenance of electronic security systems.

### Typical Clients Include -

- Retail
- Financial
- Government
- Utilities and Semi State
- Commercial
- Sporting and Entertainment
- Custodial and Correctional facilities
- Pharmaceutical
- Healthcare

## 1 - CCTV Surveillance Systems –

Many of the high-definition HD Mega-Pixel networked CCTV systems currently in use have been supplied and/or designed by Executive Security. The company has extensive experience of completing many large, high quality systems to an exacting standard, both on time and within budget.

Executive Security also provide Remote CCTV Monitoring Systems whereby live images from the CCTV cameras can be transmitted and viewed via a Local Area, Wide Area or Web-Based Network anywhere over the globe.

## 2 – Access Control -

Executive Security are providers of high-speed Smartcard Contactless and/or Biometric Access Control Systems for the Financial and Commercial industries. Systems are available from simple 2-door installations up to many hundreds of doors covering multiple sites over broadband networks and Clients LAN/WAN etc.

We offer a wide range of systems, using Mifare Smartcard Contactless, Hands-free and Biometric (fingerprint & retina) technology, all of which can be integrated into the main Access Control Software & Hardware.

## 3 – Entrance Control Solutions –

We are the sole agents in Ireland for Gunnebo Entrance Control Ltd, who are the market leaders in the field of entrance control solutions and their broad range of cost-effective standard products is complimented by a capacity to provide bespoke products, designed and built to a client's individual specification.

Where low level security is required, we offer a comprehensive suite of low height products such as speed gates, entrance gates and tripod turnstile equipment.

Where maximum security is paramount, full height entrance revolving doors and turnstiles are used. These products include maximum security booths, elegantly designed doors or full height external, tough and reliable turnstiles.

#### 4 – Intruder Detection Systems –

Executive Security uses a wide range of high quality, award winning intruder alarm equipment. Our in-depth experience of installing quality intruder alarm systems has given us the perfect insight into providing our customers with the quality products to match budgets and requirements. We can provide state-of-the-art equipment utilising upload/download technology for remote interrogation of the system. Using this facility, the company can call-up and interrogate the intruder systems panel to rectify certain system faults without the need for service engineers to be called.

This remote facility also provides an immediate on-line diagnostic facility whereby faults can be identified and also, when required, individual user codes, names, time changes, one-off changes, etc. can be made remotely. Our Service Department provides a full technical and service support back-up throughout the year on a 24-hour basis, should any service visits be required. During normal office hours, every effort is made to attend to service calls on the day of receipt of call by our team of highly qualified and skilled technicians. Our service technicians are continually updated on the latest equipment and are provided with regular technical training seminars to keep their skills up to the highest standard.

#### 5 – Video/Audio Intercom Systems –

The range of Network VoIP Audio/Video Intercom Systems we can offer extends from single station door phone systems, Office multi-occupancy systems to Ethernet & GSM connected installs allowing remote access & control of entry points. This includes both audio and video communication using digital electronic name directory module incorporated in the outdoor station. A comprehensive range of product styles is available to suit all applications and decor. We work with many of the world's leading manufacturers, to bring many years of experience to the market.

#### 6 – Systems Integration

Seamless integration of a multitude of devices and technologies, allows control room operators to take simple and intuitive control of a variety of systems - from just a single control point.

## 7 – Systems Design, Installation

Since 1979 the company's highly skilled and qualified management and technical personnel have worked on designing some of the leading security system projects in Ireland. During this time, they have amassed a wealth of experience and have provided detailed design and engineering support to many of the leading Architect & Design Consultants involved in many major commercial and/or industrial projects.

## 8 – After Sales Service & Maintenance

It is a core company belief that the standard of post installation service and maintenance is, in the long term, the key determining factor in assessing the overall benefit and therefore true value of a system to the client. In this regard, Executive Security is second to none, having gained and retained many valuable clients since the company's inception. Post installation, the speed and quality of response is a paramount importance. We aim to provide 100% first time fix rate and to this end, our Service Engineers are suitably trained in all aspects of electronic security systems.
